

# CANIFESTO

## WE BELIEVE IN SERVING BEER BY THE CAN.

Cans are airtight and oxygen-free, protecting the beer and keeping it fresh. Light and air sneaking under bottle caps are bad for beer, turning it skunky and ultimately undrinkable. (Pat is a fan of skunks and other cute little critters, but not when they're associated with a cold one.)

Yes, Pat has a little Mother Teresa in her when it comes to protecting your beer. But. She's just as fierce when it comes to protecting the environment. She loves the fact that she can crush a can with the mere weight of her hand. Pat believes that every once in a while, that kind of power feels good.

**Beer by the can.  
Why? Because we can!**
